Friedrich Fexer Campus

Vienna, July 2021

today – tomorrow – the day after ...

For the design task a pilot project for a new viennese educational-programme was developed: more than 700 children are in one communal building – nursery, kindergarden, primary school, music school and youth centre.

An open, easily adoptable building structure meets the needs of this new educational concept. From the outside it is a compact building in an heterogeneous surrounding. The 3 metres deep 'action-zone' creates identity with the building as well as a lively statement towards the city by its changing use.

The open space is clearly defined and offers protected play- and sportareas.

DATA

Location	Vienna
Country	Austria
Size	13.356 m²
Completion	2017
Client	City of Vienna
Project architect	Carmen Hottinger
Project architect (competition)	Mechthild Weber, Dominik Bertl
